

**Amy Roesler, Director**

Roesler and Associates - Principal

Amy Roesler is an experienced leader with nearly 25 years of senior corporate, utility and energy expertise. Her career has focused on technology-driven strategy development and transformation programs in sustainability, energy efficiency and emissions reduction. Her clients and experience have included industry-leading initiatives with organizations such as BC Hydro, FortisBC, Canadian Pacific Railway. As Director of Western Canada with CLEAResult, she led the design and implementation of North America's first-ever energy efficiency programming focused on measurable GHG emission reductions in commercial, industrial and junior gas facilities. She served as Vice-Chair and Board member of the Alberta Energy Efficiency Alliance from 2016 – 2019 and was Executive Director in 2020.

Amy now consults to utilities, provincial agencies and Indigenous organizations on transformational business models, programs, technologies, infrastructure, and deployment. She also serves as Board Director with ZS2 Technologies, an emerging leader in the global shift to sustainable building materials.
