

Andrea Linsky, Director

Engineering Program Manager Environment and Climate Resilience | Environment and Planning | Urban Planning and Economy – City of Edmonton

Andrea has made her career in energy and greenhouse gas management with experience in the public sector, academia, and the non-profit sector. Andrea most recently has worked as a Senior Engineering Program Manager with the City of Edmonton and has been leading the city-wide development and implementation of the Corporate Climate Management Plan and other aspects of the City's Energy Transition Plan that impact Civic Operations. Andrea's technical experience has been in building energy efficiency, building controls and automation for energy management training, renewable energy systems applications including district

energy and solar photovoltaics, and alternative energy product development. Andrea has worked on incentive program design, public policy development, demand side management projects, and change management programs.

Andrea is a professional engineer with APEGA and a Certified Energy Manager, and a Certified Measurement and Verification Professional. Andrea has a diverse education with a Degree in Chemical Engineering, Certificate in Energy Management, and a Master's Degree focused in Post-Secondary Educational Leadership.
