PACE
SOLUTIONS

**PROUDLY CANADIAN OWNED &
OPERATED FOR OVER 40 YEARS**

Solutions for Water Treatment & Energy Conservation

The value offered by Pace Solutions comes from the knowledge and skills acquired from over four decades of solving water related issues for commercial, industrial, institutional, and residential clients. Our people know the right methods and products to solve your water treatment and energy conservation concerns.

Water Treatment

Innovative solutions to address corrosion, scaling, fouling, energy efficiency, and water consumption for industrial and commercial processes, and HVAC water systems.

- Cooling towers
- Hydronic heating and chilled
- Steam boiler
- Potable water
- Wastewater

**WATER
TREATMENT
SOLUTIONS**

Energy Efficiency

Strategies and solutions to reduce water use, energy consumption, and harmful emissions.

- Save on operating costs
- Decrease utility bills
- Reduce GHG emissions
- Lower water consumption
- Improve sustainability

**ENERGY
EFFICIENCY
SOLUTIONS**

Legionella Management

Implement best practises programs to minimize the risk of Legionella and the spread of Legionnaires Disease.

**LEGIONELLA
MANAGEMENT
SOLUTIONS**

- Legionella testing
- One hour DNA test results
- Hyperchlorination services
- Decontamination procedures
- Bylaw permit management
- Biocide & bio-dispersant treatments

Pace RemoteLink™

Pace RemoteLink is our remote water treatment management system. A virtual second set of eyes on your water system to help identify abnormal operating conditions that can occur between scheduled site visits.

**PACE
REMOTELINK**

- 24/7 monitoring
- 2-way remote access
- Customizable notifications

Pre-Treatment

Our Pre-Treatment programs are engineered to remove water contaminants and impurities before the water enters the process to promote system health and optimum efficiency.

**WATER
PRE-TREATMENT
SOLUTIONS**

- Filtration
- Water softeners
- Reverse osmosis (RO)

e-Service Reporting

A next level reporting program offering secure 24/7 access to all your water treatment results. Input and access data to make informed maintenance and operational decisions.

- Instant access to reports
- Clear and customizable format
- Monitor and track trends
- Colour coded results identify where corrective actions are required

Certified Water Technologists

Pace has the most Certified Water Technologists (CWT) registered in Canada. CWT is an accreditation through the Association of

Water Technologies (AWT). A CWT designation demonstrates the recipient is a certified professional who has obtained an established level of experience and standard of excellence in the water treatment industry. Pace Technical Team members are professionally trained

through the AWT and receive continual education in our industry through our ongoing internal "*Pace Academy*" conferences.

Industries Served

Commercial institutional	Manufacturing
Industrial	Agriculture
Multi-unit residential	Horticulture
Food processing	

Service Areas

Quebec	Alberta
